Model SJ-112

Portable Roll Groover

The Model SJ-112 Portable Roll Groover is the perfect tool to meet your job site grooving requirements. The SJ-112 features reduced pipe rotation speed and enhanced hand pump pressure, resulting in accurate and sharp edged grooves in less time. The SJ-112 is available in three variation models to meet your specific requirements. All models use bearings (not bushings) for trouble and maintenance free operation. Each model is packaged in a reusable shipping / storage box.

Specifications:

Pipe Rotation Speed: 30 RPM

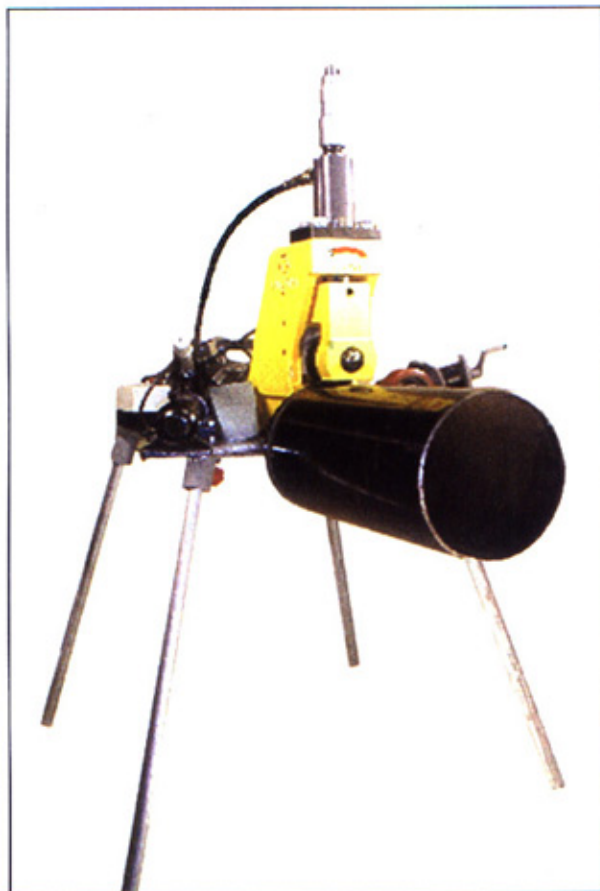

Hand Pump Capacity: 10 tonsf

Electric Drive Motor: 1 HP, 60 Hz, 220V Single Phase

Spindle Height from Floor: 30" (760mm)
